

- FFU Air Purifier

The FFU Air Purifier is an evolutionary version of the industrial FFU, which is equipment for industrial cleanroom. It is built-in with a large fan and a large size HEPA filter than most of the normal air purifier in the market. the HEPA filter is made of glass fiber and removes particles very efficiently.

Large air flow rate is the most advantageous of FFU air purifier, even just a single unit, the machine can purify air into a high cleanliness level in a room size larger than 60 m2.

The air purifier can be designed with carbon and pre filter, the carbon filter has a very good purification for smell and some other poisonous gases like HCHO.

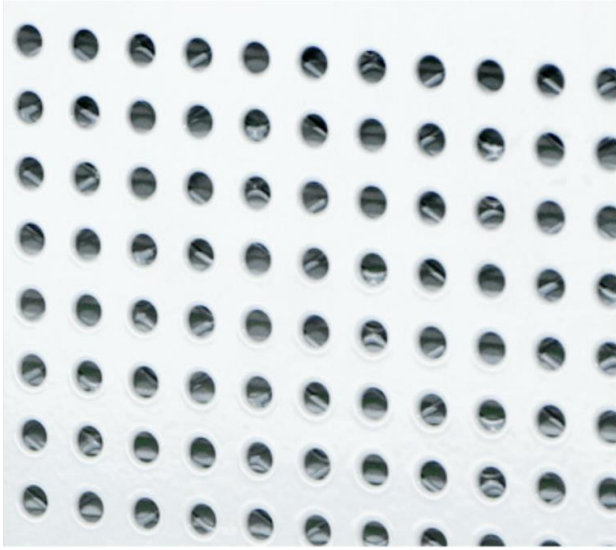

Pre filter remove most of the large contaminations to enlarge HEPA filter service life.

Specifications			
Brand	Eawayfilter	CADR	1000m3/h
Item	Air purifier	HCHO CADR	200m3/h
Input	220/110V	PM2.5	99.99%
Frequency	50/60Hz	Anti-bacterial	99.9%
Power	120W	Area	60-130m2 room
Size	580*330*1250mm	Filter	HEPA
Noise	28-58DB	Warranty	5 years
N.W.	25Kgs	UV light	Available
Control	Manual or remote	Application	Remove particles, smoke, smell
